Notification on the Impact of the Sendai Earthquake and Tsunami

We would like to extend our deepest sympathies to people who so tragically lost their lives in the Sendai Earthquake and Tsunami that struck on March 11, and hope that people in affected areas remain safe.

The extent of impact of this earthquake on Toho Tenax is as outlined below.

1. Level of damage and response

The Toho Tenax Mishima Plant, which manufactures carbon fiber products, is located in the Tohoku and Kanto region where the majority of damage from this earthquake was concentrated. Luckily there was no damage to the plant as a result of this earthquake, and the plant is still in operation.

2. Employees conditions

All employees of the Toho Tenax group are safe and have been accounted for. We are continuing efforts to contact the families of employees, and at this stage, there have been no injuries reported.
